

Since the war began, we have been on the ground, assessing needs and working tirelessly to uphold the dignity of displaced communities. By prioritizing health, hygiene and sanitation, we're providing aid to thousands of families. At the same time, we remain fully committed to our participants, continually assessing their situation to better serve them in these challenging times.

TAJ Champions Youth Expression

We launched a new season of acting classes for children and youth, creating a much-needed space for growth and self-expression.

IRSHAD Stands by its Farmers

It's apple harvest time!

We continue to support our participants with hotline assistance, field visits, marketing connections, nursery partnerships, and eco-friendly practices, especially with the apple tree pruning season just around the corner.

We provided growers in the Bekaa with cabbage seedlings from our demo plot, along with training in Good Agricultural Practices and practical field sessions.

Following the completion of the CD4 program, we remain dedicated to empowering our cooperatives through market linkages and training, in close collaboration with the General Directorate of Cooperatives.

Seed of Change

Highlights Responsible Water Use

SOC's latest virtual training, led by Dr. Amanda Newton, covered essential practices in Irrigation and Water Management to promote sustainable agriculture amid climate change.

BASATINE Supports Growers

We've been closely monitoring our farmers since the start of the escalation, offering assistance as needed.

Female farmers from Akkar and the Bekaa joined our training sessions, learning to develop business plans, build skills, and pitch their projects for potential grant awards.

Funded by the Agence Française de Développement, BASATINE is a consortium led by CARE International Lebanon, in partnership with the Georges N. Frem Foundation, Berytech Foundation, Al Majmoua, Mercy Corps and the Lebanese Organization for Studies and Training
